Test Equipment Solutions Datasheet

Test Equipment Solutions Ltd specialise in the second user sale, rental and distribution of quality test & measurement (T&M) equipment. We stock all major equipment types such as Spectrum Analyzers, Signal Generators, Oscilloscopes, Power Meters, Network Analyzers etc from all the major suppliers such as Keysight, Tektronix, Anritsu and Rohde & Schwarz.

We are focused at the professional end of the marketplace, primarily working with customers for whom high performance, quality and service are key, whilst realising the cost savings that second user equipment offers. We fully test & refurbish equipment in our in-house, traceable Lab. Items are supplied with manuals, accessories and typically a full no-quibble 1 year warranty. Our staff have extensive backgrounds in T&M which enables us to deliver industry-leading service and support. We endeavour to be customer focused in every way right down to the detail, such as offering free delivery on sales, presenting flexible technical + commercial solutions and supplying a loan unit during warranty repair, if available.

As well as the headline benefit of cost saving, second user offers shorter lead times, higher reliability and multivendor solutions. Rental, of course, is ideal for shorter term needs and offers fast delivery, flexibility, try-before-you-buy, zero capital expenditure, lower risk and off balance sheet accounting. Both second user and rental improve the key business measure of Return On Capital Employed.

We are based in at Oakley, Bedfordshire in the UK from where we supply test equipment worldwide. Our facility incorporates Sales, Support, Admin, Logistics and our own in-house Lab.

All products supplied by Test Equipment Solutions include:

- No-quibble parts & labour warranty (we provide transport for UK mainland addresses).
- Free loan equipment during warranty repair, if available.
- Full electrical, mechanical and safety refurbishment in our 40GHz in-house Lab.
- Certificate of Conformance (calibration available on request).
- Manuals and accessories required for normal operation.
- Free insured delivery to your UK mainland address (sales).
- Support from our team of seasoned Test & Measurement engineers.
- ISO9001 quality assurance.

DLRO100 Series

Megger Digital Low Resistance Ohmmeters

- CAT IV 600 VAC / 500 VDC for safe operation
- Lightweight 100 A battery powered unit for portability
- High noise immunity for stable readings
- Smooth DC Output for circuit breaker testing
- IP54 for protection against dust and moisture whilst testing
- Save, download and delete results (100X/H variants)
- Remote operation, Bluetooth
 « asset/result tagging (100H variants)

DESCRIPTION

A significant addition to the comprehensive range of Megger Low Resistance Ohmmeters, DLRO100 enables low resistance measurement, across multiple applications, in areas without access to mains power. The integral Li-lon battery supplies a constant 100 A current for up to 200 Manual/Auto tests to enable enhanced productivity in remote locations. With a focus on user safety, advanced design features ensure the safe operation of the instrument in the most adverse conditions, including a CAT IV 600 VAC / 500 VDC safety rating in accordance with IEC61010. The rugged design, intuitive interface and IP54 (lid open) rating ensure reliability and ease of use in the most arduous of conditions.

Test Modes

The **Manual test** mode allows the user to initiate the test procedure once the probes are in contact with the object under test. Once the TEST button is depressed the TEST lamp will illuminate and the instrument will undertake a single test to verify the resistance of the test object.

In **Auto mode** the user selects the desired current, connects the current test leads and as soon as the potential leads are connected a test will start automatically. To repeat a test, simply break contact with the potential probes and remake contact.

In **Continuous mode** the user connects the test leads and presses the TEST button, initiating the test procedure. The instrument will continue to test, updating the display after each new test cycle, until the TEST button is pressed or the test procedure times out.

Test Leads:

Standard test leads, with separate Current & Potential, or Kelvin, combining both Current & Potential in one clamp, are available as optional accessories in 5 m, 10 m & 15 m lengths. All test leads are CAT IV 600 VAC / 500 VDC safety rated.

A new tough adjustable clamp has been designed to ensure flexibility in many applications and provides a good connection with the test piece.

History of 'Ducter' testing

For over 100 years the 'Ducter test' has been used to describe a simple test for measuring very low contact resistances and "Ducter", which is still used as a trade mark, was the name originally given to the low resistance ohmmeter manufactured by Megger. The name Ducter was registered by Megger in June 1908 and 'Ducter' has since become the industry standard.

APPLICATION

The need for accurate low resistance measurement is well known and very diverse. Typical applications include:

Utilities & Service Contractors - commissioning new installations & regular maintenance testing of

- Switchgear and circuit breaker contact resistance
- Busbar and cable joints
- Wire and cable resistance
- Lightning conductor bonding

Original Equipment Manufacturer - detecting manufacturing defects

- Production test of circuit breakers contacts & joints
- Production test of high voltage switchgear
- Production test of welded joints & connections

Transport - manufacturing & maintenance

- Railway rolling stock ground connections & manufactured joints
- Railway lines & conductor rails commissioning & maintenance
- Aircraft frame bonds and static control circuits

SPECIFICATIONS

Measurement range $0.1~\mu\Omega$ - $1.999~\Omega$

Resolution $0.1~\mu\Omega$

Differential 100 mV @ 50-60 Hz **Noise rejection**

on Test Leads

DC output Smooth DC

IP rating IP54 Lid open / IP65 Lid closed

Operating temperature

range

-20°C up to 50°C

Storage temperature range -30°C up to 70°C

Humidity <85% R.H. non-condensing **Battery life** 200 single 100 A tests or up to

2x 10 minutes continuous 100 A

Battery type User replaceable Li-ion battery

pack

Battery charge time Full charge in 2.5 Hrs from flat Maximum output voltage 2 V (battery), 3 V (AC)

EMC IEC61326-1

Safety

IEC61010

CAT IV 600 VAC / 500 VDC up to

CAT IV 300 V up to 4000 m

Dimensions 400 x 300 x 200 mm Weight 7.0 kg (AC Only) 7.9 kg (with Battery)

Accuracy

Current setting#	Resistance range	accuracy
50 - 110 A	$0 - 100.00 \text{ m}\Omega$	Typical $\pm (0.2\% + 0.2 \mu\Omega)$

FEATURES AND BENIFITS

			DLR	0100			
Features	E	EB	Х	ХВ	Н	НВ	Benefits
CAT IV 600 VAC / 500 VDC up to 2000 m CAT IV 300 V up to 4000 m	•	•		•	•	•	On all test terminals for safe operation
Lightweight 100 A battery powered unit		•		•		•	Easily portable – 7.9 Kg (17 lbs) with battery
Mains only	-				•		Mains only units for manufacturing and production applications where AC is always available. Weight 7.0 Kg (15.5 lbs)
High noise immunity	•	•	•	•	•	•	For stable readings in noisy environments
Smooth DC Output							Circuit breaker testing
IP54 Lid open IP65 Lid closed		•		•	•		For protection against ingress during operation (lid open) and storage (lid closed)
Li-ion battery		•		•		-	Always ready to test with a Li-ion fast charge battery - 2.5 hours charge time from fully discharged Works from an AC supply if the battery is fully discharged Battery capacity - 200 single tests or up to 2x 10 minutes continuous 100 A output for extended use
100A Manual,							COL STORM
Auto and Continuous test	•	•	•	•,	5		Quick selection of test modes for different applications with 4 terminal measurement for flexibility
Custom test	•	•					Adjustable current 10 - 110 A, ramp rates configurable from 0.5s upto 30s and configurable test duration for flexibility
Range and test mode rotary switches	•			-0			Quick and easy selection of current ranges and test modes
Ultra tough outer case construction	•	•		Ŀ	it's	CONO	Designed for use in demanding environments with a flame retardant UL94 VO inner case for safety
Dual Ground™			*	*		*	Using the optional DC clamp enables circuit breaker testing with ground protection in place for safety
Large, clear LCD							Ideal for all light conditions, with backlight
Internal memory storage with USB download capability				•	•	•	For effective results management, up to 220 time and date stamped records
Remote Control					•		Control the instrument remotely over USB via a PC or laptop for added safety
Asset tagging					•	•	Running a PowerDB app on Windows tablet or smart phone to populate unique asset IDs for efficient asset management
Bluetooth®							For effective wireless communication. For download and asset tagging

^{*} with optional Clamp

All models. Two year warranty - second year conditional on free product registration.
