

## **Dial Indicators**

Comparison measuring instruments which ensure high quality, high accuracy and reliability.

## **SERIES 1 — Compact Type, Extra Small Diameter**

 Compact dial indicators with bezel diameters of 31 or 36 mm for restricted-space applications in gaging jigs.

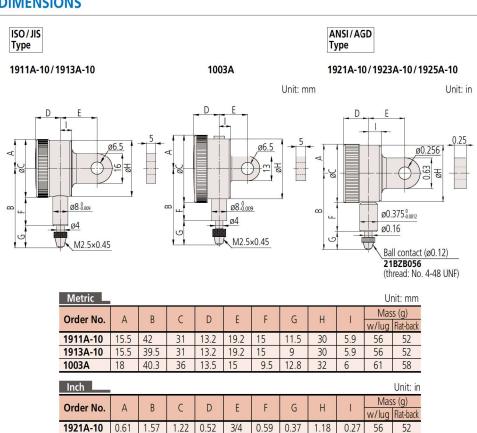

Comparison measuring instruments which ensure high quality, high accuracy and reliability.

## **DIMENSIONS**

1.22 Note 1: Limit hands, bezel clamps and lifting levers cannot be installed.

0.53

1.22 0.52

Note 2: The shoulder on a contact point (standard accessory) acts as a stop to prevent spindle overrun that may otherwise damage the indicator. For this reason, if you need to install an optional contact point with an outside diameter smaller than 7 mm, use a washer (with outside diameter of at least 7 mm, inside diameter of 3 mm, and thickness of approx. 0.5 mm) placed between the contact point and the spindle.

Note 3: Being fixed by only two retaining screws, the back cannot be rotated by 90° to change the orientation of the lug.
